Introduction.

High Bridge Academy is an EdTech, home to a unique online Consulting Bootcamp, designed and delivered by **50+ experienced ex-McKinsey, Bain, and BCG consultants.**

Our Mission is to give young talent, **regardless of their background**, the opportunity to **achieve their career goals in Consulting** - through skills & mindset development and networking.

Our Consulting Bootcamp is a **one-of-a-kind intensive program** that combines live classes, drills, and assignments to develop and sharpen the on-the-job skills candidates need for a successful career in Consulting.

High Bridge was **founded in 2020** by Flavio Soriano, an ex-McKinsey consultant.

Headquartered in Dubai, but with a global team.

Logo.

Our logo.

There are two primary versions of our logo: the primary logo, and the stacked logo.

The stacked logo may be used when the provided space is square or vertically elongated, and the horizontal lockup will make the logo look too small.

It may also be used to add variety in circumstances where the horizontal logo is being used frequently elsewhere.

Color variations.

Here’s how we lay it out.

Our primary logo consists of the dark blue and blue-green gradient logomark and the some blue wordmark on a white background. Our logo may appear in any of the formats shown here.

The logo color should be determined by what would best complement the visual of the communication, while maintaining legability.

Grayscale logo

One color mono logo

Logo usage.

The exclusion zone

The High Bridge Academy logo should always be surrounded by a minimum amount of space. A margin of clear space equivalent to two-thirds the width of the logomark is drawn around the logo to create an invisible boundary and an area of isolation.

The stacked logo clearance is equal to half the width of the logomark. These area of separation are minimum standards, and should be increased whenever possible.

Minimum size

There's no predetermined sizes for the High Bridge Academy logo. Scale and proportion should be determined based on available space, aesthetics, function and visibility.

There's no preset maximum size for the High Bridge Academy logo, either. Minimum sizes are shown here.

Digital: 90px width
Print: 32mm width

Digital: 65px width
Print: 23mm width

Digital: 35px height
Print: 13mm height

Typography.

Typefaces.

We have two typefaces that are used for headers, subheaders, body, and quotes. Anything that is typed out as content uses these typefaces. Exceptions would be possible if the text is an artwork element. However, in this case, the style must still work with these typefaces.

Primary typeface

Nunito Sans

Nunito Sans is the primary typeface; Use it for web and social media graphics (both headlines and body text). It can be used in seven weights, Extra Light, Light, Regular, Semi Bold, Bold, Extra Bold and Black as well as the italic versions for each.

Nunito Sans Extra Light
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Nunito Sans Light
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Nunito Sans Regular
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Nunito Sans Semi Bold
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Nunito Sans Bold
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Nunito Sans Extra Bold
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Nunito Sans Black
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Secondary typeface

Arial

Arial is used on PowerPoint presentations, Word documents, and e-mail communications. Weights include Regular and Bold as well as the italic versions for each.

Arial Regular
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Arial Bold
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789

Colors.

Primary colors.

These should be your first choice when designing any communications and used for large coverage areas, like backgrounds, or spot colors to highlight information.

Brand Application.

Stationery.

PowerPoint Presentations.

Social Media.

Glossary.

Glossary.

AI - AI is a proprietary vector image format that stands for Adobe Illustrator. The format is based on both the EPS and PDF standards developed by Adobe. Like those formats, AI files are primarily a vector-based format, though they can also include embedded or linked raster images. AI files can be exported to both PDF and EPS files (for easy reviewing and printing), and also JPEG, PNG, GIF, TIFF and PSD (for web use and further editing).

BRAND - What people think and feel about an organization, company or product. It can be negative, positive or anywhere in between.

BRAND EQUITY - A number of brand assets and liabilities are closely related to a brand, name and symbol, which can increase or decrease the value of a good or service to the company or to its customers. Basically, brand equity is the strength of a brand.

CMYK - Cyan (blue), Magenta (red), Yellow, Key (black). Used in offset and some digital printing, these four inks are mixed to reproduce colors that are printed on paper or other surfaces.

COATED & UNCOATED - Types of paper stock used for printing. Coated paper contains a high clay content polished to a smooth finish which can be dull, matte or gloss. Uncoated paper contains no clay and has a dull surface (e.g., copy paper). Inks absorb differently on different paper stocks, changing in tone and intensity.

CONTRAST - The difference between light and dark areas in an image. The wider the tonal range in an image, the lower the contrast.

EPS - Encapsulated Post Script. A graphic file format best used for offset printing. Can be vector (line) or pixel (dot) based. Usually created in Adobe Illustrator or Photoshop.

HEX - The hexadecimal number system is a way of representing Web colors in HTML. Each successive digit or number represents a multiple of a power of 16. It uses the digits 0-9 plus the letters A, B, C, D, E, F, and G.

JPG/JPEG - Joint Photographic Experts Group. Commonly used method of compression for photographic images. Good, all-around format for Word or PowerPoint.

LOGO - A graphic element often locked with a wordmark to form a visual for an organization's brand.

PANTONE/PMS - The Pantone Matching System (PMS) is a color standardization system that helps in color identification and matching. It uses the Pantone numbering system to identify colors, and through this numbering system printer and other equipment manufacturers can match colors without having to contact one another.

Glossary.

PDF - PDF stands for Portable Document Format and is an image format used to display documents and graphics correctly, no matter the device, application, operating system or web browser. At its core, PDF files have a powerful vector graphics foundation, but can also display everything from raster graphics to form fields to spreadsheets. Because it is a near universal standard, PDF files are often the file format requested by printers to send a final design into production. Both Adobe Photoshop and Illustrator can export straight to PDF, making it easy to start your design and get it ready for printing.

PNG - Portable Network Graphics. The PNG format is a popular alternative to GIF, using better compression and not limited to 256 colors. Not suitable for professional photo images. Transparent backgrounds will remain transparent, instead of appearing white in a document or presentation.

RASTER - Raster images are made up of a set grid of dots called pixels, where each pixel is assigned a color value. Unlike a vector image, raster images are resolution dependent. When you change the size of a raster image, you shrink or stretch the pixels themselves, which can result in a significant loss of clarity and produce very blurry images.

RGB - Red, green, blue. Additive colors used by electronic displays, such as televisions and computers, to reproduce colors. Color can vary screen to screen unless all monitors are uniformly calibrated. Image files created in RGB can be embedded into Word or PowerPoint files, which can then be outputted on most inkjet and laser printers.

SERIF - A serif is a small line used to finish off a main stroke of a letter. A typeface that has serifs is called a serif typeface. A typeface without serifs is called sans-serif, from the French sans, meaning “without.” For body copy serif fonts are generally considered more readable on printed materials, while sans-serif is considered more legible on computer screens.

SIGNATURE - Any combination of a logo or mark and logotype or wordmark, which serves as an official identity element.

TINT - A gradation of a colour made by adding white to it or lightening it to lessen its saturation.

TRADEMARK - One or a combination of words, designs or sounds used to distinguish the goods or services of one person or organization from those of others. A trademark may be unregistered or legally registered, and the owner of the trademark has legal rights which restrict the use of the trademark by others.

VECTOR - Vector images are made up of points, lines, and curves that can be infinitely scaled without any loss in image quality.

WORDMARK - A standardized graphic treatment of a trade name to identify and brand a company, institution or product.
